Description

At any point where the process pressure has to be indicated locally, and, at the same time, a signal is wanted to be transmitted to a central controller or remote control room,

The model PGT1 high-quality, stainless steel safety pressure gauge with a nominal size of 100 or 160.

the electrical output signal
proportional to the pressure, 4 ... 20 mA, is produced.

The measuring span (electrical output signal) is set automatically along with the mechanical display, i.e. the scale over the full display range corresponds to 4 ... 20 mA. The electrical zero point can also be set manually.
