

## Compact Design Cooling Element

### Model: MDS2

#### Applications

- Cooling elements are used when the medium temperature would exceed the permissible temperature limit of the pressure measuring instrument.
- Dissipates elevated live steam temperature
- Rugged design for direct mounting
- Process industry: Chemical/petro chemical, power stations, food and beverage, offshore oil rigs, pulp and paper, environmental technology, machine building and general plant construction

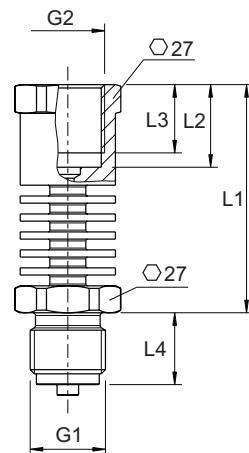

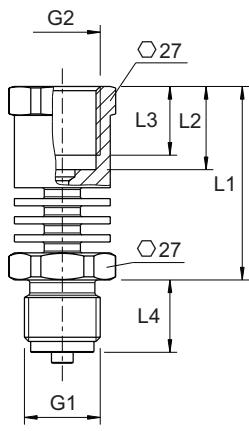

#### Special features

- For medium temperatures up to 200°C
- All stainless steel 316L
- Pressure ranges up to 1000 bar
